London Crime Poll

Survation.

Methodology

Fieldwork Dates

28th June – 3rd July 2018

Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

Population Sampled

People aged 18+ living in London

Sample Size

1,005

Data Weighting

Data were weighted to the profile of people aged 18+ living in London. Data were weighted by age, sex, ethnicity and subregion. Targets for the weighted data were derived from Office for National Statistics data.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,005 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from crossbreaks with very small sub-samples should be treated with caution.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.

Q35. Group Violence Interventions (GVIs) are designed to reduce gang- and drug-related violence by directly engaging with those involved in gangs to promote a credible moral message against violence, notice about the consequences of further violence, and a genuine offer of help for those who want it. Supporters of GVIs say that they have been successful in many US cities, as well as Glasgow in the UK, by reducing the dynamics in gangs that promote violence by creating collective accountability and fostering social pressure that deters violence. However, opponents say that despite the success in Glasgow, GVIs are less likely to work in London due to differences between the UK and USA, such as gangs in London tending to be more fluid and less hierarchical than the US, making it more difficult to foster group-wide pressure and accountability. To what extent would you support or oppose a GVI approach being taken in London?

Q37. Senior police officers also have the power to authorise stop and search operations for limited periods in areas they believe will experience serious violence, although they do not need to suspect any particular individuals. This is commonly known as a 'suspicionless' stop and search. Supporters of this say that it is the "randomness and the unpredictability of the search which has the deterrent effect" to stop individuals carrying weapons. However, opponents say that the powers are used "disproportionately" against black and minority ethnic individuals. To what extent do you support or oppose the power of police to use 'suspicionless' stop and search for limited periods in areas they believe will experience serious violence?

Table 38
Q38. When courts sentence individuals for possession of weapons or other related offences, they could be permitted to impose a condition that would give police the power to search that offender without suspicion for the duration of any sentence spent in the community to help prevent and detect crime. To what extent would you support or oppose such a measure?

	38	35	<p>Q35. Group Violence Interventions (GVIs) are designed to reduce gang- and drug-related violence by directly engaging with those involved in gangs to promote a credible moral message against violence, notice about the consequences of further violence, and a genuine offer of help for those who want it.</p> <p>Supporters of GVIs say that they have been successful in many US cities, as well as Glasgow in the UK, by reducing the dynamics in gangs that promote violence by creating collective accountability and fostering social pressure that deters violence.</p> <p>However, opponents say that despite the success in Glasgow, GVIs are less likely to work in London due to differences between the UK and USA, such as gangs in London tending to be more fluid and less hierarchical than the US, making it more difficult to foster group-wide pressure and accountability.</p> <p>To what extent would you support or oppose a GVI approach being taken in London?</p>	Base: All Respondents	1005
	39	36	<p>Q36. Police officers have the power to stop and search you if there are reasonable grounds for suspicion and they tell you what the reason is.</p> <p>To what extent do you support or oppose the power of police to use stop and search?</p>	Base: All Respondents	1005
	40	37	<p>Q37. Senior police officers also have the power to authorise stop and search operations for limited periods in areas they believe will experience serious violence, although they do not need to suspect any particular individuals. This is commonly known as a 'suspicionless' stop and search. Supporters of this say that it is the "randomness and the unpredictability of the search which has the deterrent effect" to stop individuals carrying weapons.</p> <p>However, opponents say that the powers are used "disproportionately" against black and minority ethnic individuals.</p> <p>To what extent do you support or oppose the power of police to use 'suspicionless' stop and search for limited periods in areas they believe will experience serious violence?</p>	Base: All Respondents	1005
	41	38	<p>Q38. When courts sentence individuals for possession of weapons or other related offences, they could be permitted to impose a condition that would give police the power to search that offender without suspicion for the duration of any sentence spent in the community to help prevent and detect crime. To what extent would you support or oppose such a measure?</p>	Base: All Respondents	1005
